

GLFLI Lake Superior Workshop – Evaluation Comments

What subjects would you like to see addressed at future GLFLI workshops?

- Round Table Discussion with other state/Lake Superior membership to try to conduct a conflict resolution on certain issues that affect each respective stakeholder group.
- Techniques being used to restore sturgeon and control nuisance species.
- Modeling, ECOSIM.
- Cormorants and their problems.
- Following meeting to bring future leaders together. Tribes, agencies, sportsmen, commercial fishing.
- What to do with what we have learned

How could the workshop be improved?

- Less subjects, more time for questions.
- Need better representation from all user groups.
- Have presenters provide paper copies of presentation and have a web site to get PowerPoint presentations.
- Need more participation by more users.
- Advertise it better

Are there any comments that you'd like to share?

- Needed more time in asking people to sign up for.
- Need to continue with open communication with agency, commercial fishers, charter & recreational fishers.
- Would like to address more “state specific” issues, and involve all user groups/stake holders in discussion/solution.
- Good idea, keep it up and keep working to improve it, and invite me to the next one!
